ABOUT ME

I'm Andrea, i LOVE to solve problems.
I like to analyze situations from different perspectives, to find the best solution for quality and efficiency.
I'm interested in all the latest in technology, and i also often wander with my mirrorless camera.

EXPERIENCE

2020 **Frontend Development @ Prima Assicurazioni (Milan)**

I had the challenging opportunity to join Prima.it as a frontend developer, in the product development division.
I worked in a multidisciplinary team, with an extremely agile development process, and deep functional programming expertise.
I was also given the opportunity to work first hand on a huge project with a complex lifecycle organization, scaled onto multiple teams and multiple technologies.

2016
2020 **Frontend web development @ Develon Digital (Vicenza / Milan)**

I built the frontend experience of websites and web applications, and worked in many different fields such as e-commerce platforms, corporate and product websites.
I developed products with different backend technologies, such as Ruby on Rails, NodeJS and PHP and worked with the team to transition the frontend approach from a server templated one to client rendered web applications, with Vue JS.
I implemented server prerendering solutions and server side rendering, alongside careful optimizations on projects to improve both application and search engine indexing performances.
I worked on projects with both high availability and high security requirements, and on immersive customer experiences.
Also contributed to open source components which we used in our projects.

2015 **Internship @ San Marco Informatica (Vicenza)**

I took an internship at San Marco Informatica before my graduation, where i was assigned to the frontend team.
San Marco informatica develops ERPs to support company processes.
There, i developed a Java API to interface with a SQL database, to retrieve project management data (such as resource assignments and workload data) which i visualized into an Angular JS application.

EDUCATION

2016 **Bachelor degree**
Computer Science Bachelor Degree,
Università degli Studi di Padova, Padova IT

SKILLS

HTML5	CSS	ES6	Vue	Nuxt
AMP	Git	NodeJS	PostCSS
Webpack	React	Svelte	Rails
